

QUALITY, HEALTH AND SAFETY, AND ENVIRONMENTAL POLICY

E-TOWERS FAMABA Spółka Akcyjna is a significant manufacturer and supplier of steel structures. The company specializes in the production of large-sized steel structures such as:

- Towers for offshore and onshore wind turbines
- Secondary constructive elements of wind turbines
- Components of steel harbor cranes, overhead cranes, chimneys, radio and phone masts.

Our mission:

Thanks to active consulting and competence in each phase of the project, as well as to strive for effective cooperation with our customers, we offer constructions of a high quality, which meet all standards and satisfy expectations of our recipients.

Our vision:

- endeavoring to satisfy expectations of our clients in the area of offered products, on-time deliveries and prices.
- gaining new markets in a way of expanding range of offered products and services.
- strengthening position of the company and increasing sale on domestic and international markets.

Most important for us:

- increasing customer's satisfaction by paying special attention to reliability and safety of our products.
- meeting legal and all other requirements which refer to the field our activity.
- constant improvement of products and services, as well as development of competences of our employees.
- managing all processes with regard to safety rules, industrial accidents prevention and environmental protection.
- engaging employees in active participation in improvement of quality, health and safety at work and environmental protection.

According to the policy, the top management obliges to actively promote and fulfill the requirements of Integrated Management System at all levels and in all areas of the activity.

The Quality Policy of our company is available to all to whom it may concern.
